DFSOLUTIONS

Imagine a home where every room has instant access to every DVD and CD you own, where you no longer have to worry about lost or scratched discs, where playback is completely independent of every other room, with an interface that is simple enough for every member of the family.

Whatever

The iDyl™ and Video Node™ can playback DVDs, CDs, HD video clips, internet radio stations, MP3 and other audio file types, it can view your digital photos, in fact pretty much everything that really matters. Easily create your own personal slideshows or audio playlists, and browse your entire DVD collection by Title, Director, Actor or Genre.

Wherever

An iDyl™ comes with HD-capable video playback for a truly awesome video experience, and up to 17 independent audio outputs. Centrally located, the iDyl™ offers a truly discrete multiroom entertainment solution from one unit.

Whenever

Any iDyl™ or Video Node™ zone is completely independent from each other. So you'll never have to worry about the kids disappearing with the best DVDs. With features such as Wake and Sleep timers, and the ability to assign pre-selected media selections to various 'Hotkeys' and macros, you have maximum control with the minimum of effort.

The iDyl™ is 3 products in one – It's a DVD jukebox, a Multiroom Audio Server and a network attached storage device.

iDyl™ + Video Node: The perfect combination

The iDyl™ has a single video-zone output, with up to 17 independent audio outputs. For independent Multiroom Video, you will need 1 or more Video Nodes™. Each Video Node is a media zone in itself, with the ability to playback video, audio and pictures, so that every room of the house can have it's own DVD jukebox.

A digital jukebox in every room of the house

Loading Media/Storage

Media can be loaded directly to the iDyl™, or copied from a networked PC. CD track listings, cover-art, DVD information and reviews are automatically downloaded from the internet (broadband connection required). The iDyl can also aggregate content from multiple NAS devices seamlessly into its' (and other Video Nodes) interface. As such, the DVD library size is unlimited.

Suggested Viewing

Both DVD and CD browse screens enhance your experience by highlighting related content for you to select. For example, if you're browsing your DVDs and highlight 'Titanic', a separate grid will appear listing DVDs such as 'The Beach', 'The Abyss' and 'Heavenly Creatures', because they feature related actors and directors.

Parental Control

All video zones in the house have fully independent, configurable parental control options for DVD listings. For example, if you have a Video Node sourcing a kids' bedroom, it can be set to only list and play PG or U DVDs, offering complete piece of mind.

Operation

Full control of your iDyl™ is available from:

- TV-interface.
- I.R. Remote.
- Win 2000/WinXP/Samsung Q1/WiFi-enabled PDA.
- Crestron, Speakercraft, Linn, Opus, Systemline, Phillips Pronto, Sonance, Living Control and other 3rd party Multiroom Control Systems.

iDyl™ and Video Node™ Highlights

- Fully independent, simultaneous control of up to 17 audio zones.
- HD-ready video output / video up-scaling, 720P and 1080i output.
- Browse your entire DVD collection by Title, Director, Actor or Genre.
- Select audio by album, artist, genre, playlist.
- Streamable Net Radio Stations (broadband connection required).
- Store, access and create slideshows from your entire digital photo collection.
- Connect up to 3 external audio sources to your iDyl™, and switch between these inputs or iDyl-stored media.
- Build dynamic play-lists quickly and easily.
- Seamless integration with iTunes, Windows Media Player and mobile MP3 players.
- Video Node™ provides data backup mechanisms for iDyl™-stored media.

Installation Scenario

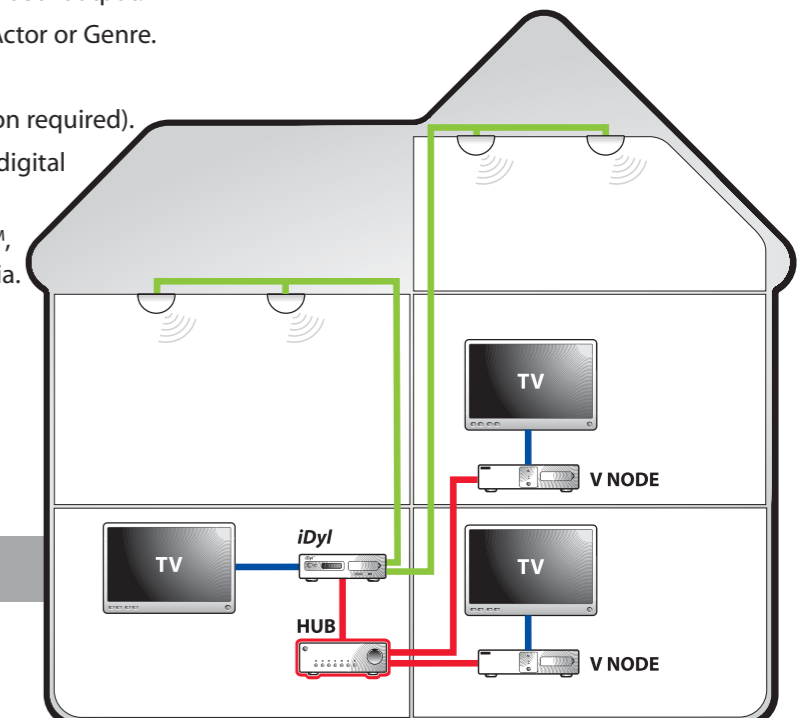

3 Audio/Video zones + 2 Audio zones

Unlimited DVDs, music and pictures at your fingertips

Key:

- Audio cabling
- Ethernet cabling
- Local audio/video 3 cabling
